

SRE NETWORK EXECUTIVE SYMPOSIUM

A Networked Approach to Sector-wide Solutions - 2:45 pm

Going from My Organizational Challenge to How We Might Solve This Problem as a Sector

Getting to Solutions: Steps 1-5

Each of these steps should be done collaboratively, as a table.

Step One

Together as a table, spend up to 5 minutes sharing out themes from previous conversations.

- What stuck out about the challenges and solutions that were shared?
- Were there commonalities in the challenges and solutions? Any trends?

Step Two

Pick up to two challenges that feel the most resonant or stickiest to explore further.

Write the name of the challenge at the top of the easel paper.

Step Three

Take this time as a table to generate sector-wide solutions to this challenge by considering:

1. What would it look like for our sector and communities if this challenge were solved?
2. How might we as a sector solve for this?
3. What could possible interventions or solutions look like to change this?
4. What would need to be true/what conditions would have to exist?

Step Four - Add your group's big ideas to the easel page and post it on the wall.

Step Five - Repeat Steps 3 and 4 (as time allows)

Gallery Walk

At the end of this exercise, spend 10 minutes doing a gallery walk and reading the other posters.

- Add your own notes using the post-its.
- Stand by the poster that you're most excited to discuss.
- Talk with a group there for 15 minutes.
